ANTIGEN TEST: For those who want rapid results, are a close contact, and/or have symptoms.

**NEGATIVE ANTIGEN RESULT**
- **NO SYMPTOMS**
  - No additional testing. You most likely do not have COVID-19 at this time. Continue to monitor for symptoms. Test as needed.
- **SYMPTOMS**
  - Positive Result
    - Continue to isolate and take a PCR test as soon as possible. If no PCR test is available, repeat antigen test 24 hours later.
  - Negative Result
    - No additional testing. You most likely do not have COVID-19 at this time. Limit contact with others while you’re sick. Consult a health care provider if you have questions.

**POSITIVE ANTIGEN RESULT**
- Isolate for at least 5 days and until:
  - You have been at least 24 hours without a fever (without fever-reducing medicine), AND your other symptoms are resolving. Isolate longer if you are instructed to do so by a contact tracer or medical professional.
  - Wear a mask around others for 10 days following a positive test result.

**Reporting Results**
In keeping with the state’s COVID-19 reporting practices, you are not required to submit results from self-administered antigen tests to the MyUHS app or website. Currently the state requirement for reporting is a positive PCR test or a positive antigen test administered by a trained individual at a testing site.
